## **NATIONAL BUSINESS DATABASE**

Our National Business Database offers information on over 13 million United States businesses. Stewart Directories updates this database monthly, verifying information including number of employees, sales volume, company address and contact names. We help you avoid the tedious task of working with several sources for your total direct marketing programs by providing both consumer and business information. **Source:** Business Credit Database, national business white and yellow pages directories, state and federal public records, financial and industrial directories.
